PROFESSIONAL SUMMARY

BS Computer Science undergraduate at FAST-NUCES, Peshawar, with hands-on academic experience in C and C++ programming, file handling, problem solving and digital logic. Developed console-based applications involving persistent data storage, input validation, game logic and quiz management. Currently strengthening software development and web development fundamentals through academic and personal projects.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

FAST National University of Computer and Emerging Sciences (FAST-NUCES), Peshawar

Expected Graduation: 2029

FSc — D.J. Sindh Government Science College

Overall Percentage: 75%

Matriculation — The Citizens Foundation (TCF)

78.4% · Grade A

TECHNICAL SKILLS

Programming: C, C++

Web: HTML, CSS

Core Concepts: Problem Solving, File Handling, Arrays, Strings, Programming Logic, Digital Logic

Tools & Platforms: GitHub, Vercel

Productivity: Microsoft Word, Excel, PowerPoint

SELECTED PROJECTS

MCQ Test Management System | C

GitHub: [github.com/Sheikh-Touqeer/MCQ-Test-System-C](#)

- Developed a file-based console application supporting Easy, Normal and Hard question banks.
- Implemented question insertion, A/B/C/D input validation, immediate answer feedback, result calculation and persistent quiz history.
- Applied C file I/O, functions, arrays, strings, switch statements and time functions.

Minesweeper Game | C

GitHub: [github.com/Sheikh-Touqeer/Minesweeper-Game-C](#)

- Developed a 4×4 console-based Minesweeper game featuring configurable mine positions and adjacent-mine calculations.
- Implemented win/loss logic, input validation, persistent game history, player search and Top 3 Explorer rankings.
- Applied 2D arrays, file I/O, string handling, searching, sorting and conditional logic.

Physical Digital Clock | Digital Logic Design

- Constructed a physical digital clock on breadboards as an academic Digital Logic Design project.
- Integrated multi-digit seven-segment displays with interconnected digital circuitry for visual time output.
- Gained practical experience with digital logic, circuit integration and hardware troubleshooting.
